WISCONSIN APPRENTICESHIP SINCE 1911

Apprenticeship is a structured system of training designed to prepare individuals for skilled occupations. It combines on-the-job learning under the supervision of experienced journey workers with related classroom instruction. It is sponsored by employers, employer associations, or labor/management groups that can hire and train in a working situation.

The employment opportunity is the most basic requirement for an apprenticeship. Without a job there is no "on-the-job" learning, and such training represents about 90% of the program. Apprentices who successfully complete the prescribed number of training hours in an apprenticeship program become certified skilled workers.

Ironworker

Raise, place, and unite iron or steel girders, columns, and other structural members to form completed structures or structural frameworks. May erect metal storage tanks and assemble prefabricated metal buildings.
